

Community Housing and HomeStart.

HomeStart has provided affordable home loans to the South Australian community for over 20 years.

As a state government initiative, we've helped over 58,000 South Australians overcome the barriers to home ownership with our unique home loan products.

We believe that affordable accommodation is essential to the health, well being and ongoing sustainability of our local communities.

We recognise that community housing organisations play a key role in bridging the gap that exists between demand and supply of suitable, affordable long-term accommodation. However, access to affordable debt finance to help grow housing stocks may be a significant challenge for the sector.

We are well-placed to assist your organisation to meet the challenges of operating in a commercial environment, and achieve sustainable growth.

So if you have an affordable housing project under development, come and see us.

We offer:

Experience

We've helped finance construction projects to assist many South Australians and their families to achieve stable accommodation. We will work closely with you to understand the needs and challenges facing your organisation.

Tailored finance solutions

We provide tailored commercial finance solutions to help increase your affordable housing stock in a way that helps you manage your cash flow and business.

Friendly, local service

Our Community Lending Team will work with you to develop the best solution to meet your needs. We are locally based, and never far away if you would like to talk face-to-face.

Talk to us

To find out how we could help with finance for your next affordable housing project, contact us for an appointment to discuss your plans.

HomeStart's Community Lending Team

Elda Robinson

Elda has many years of experience as a lender with HomeStart. Elda has also owned and operated a retail business, and also worked with the South Australian Government Finance Authority (SAFA) specialising in cash management.
